

CRADLE OF LIFE THE DISCOVERY OF EARTHS EARLIEST FOSSILS

Jan 27, 2021

[Cradle Of Life The Discovery Of Earths Earliest Fossils](#)

Breaking news that recent discoveries may push back traces of the earliest forms of life on earth to a remarkable 3.77 billion years ago brings new relevance to Cradle of Life: The Discovery of Earth's Earliest Fossils, by J. William Schopf, a dazzling exploration of how science was able to overcome substantial obstacles to look back to the very edges of the dawn of life on our planet. Schopf, professor of earth sciences at UCLA, is a paleobiologist with a long, impressive ...

One of the greatest mysteries in reconstructing the history of life on Earth has been the apparent absence of fossils dating back more than 550 million years. We have long known that fossils of sophisticated marine life-forms existed at the dawn of the Cambrian Period, but until recently scientists had found no traces of Precambrian fossils. The quest to find such traces began in earnest in the mid-1960s and culminated in one dramatic moment in 1993 when William Schopf identified fossilized ...

Cradle of Life recounts the relatively brief history of the beginnings of the scientific field of paleobiology from questions posed by Darwin, to the latest discoveries of Schopf himself. The unique personal point of view allows the most casual reader to follow Schopf along through his pursuit of a great scientific discovery from his time in undergraduate studies through the analysis of the oldest fossils known to man. The detailed evidence supporting the claims on the age of these fossils ...

According to existing archaeological and fossil evidence, however, the Cradle of Humankind is the Afar Triangle in East Africa, which is often referred to as the Cradle of Humanity. [6] [7] The Sterkfontein Caves were the site of the discovery of a 2.3-million-year-old fossil Australopithecus africanus (nicknamed " Mrs. Ples "), found in 1947 by Robert Broom and John T. Robinson .
