The idea that there is such a thing as moral development relies on the following assumption: Whether or not there is an objective right and wrong out there, there is something that, as human beings, we take to be so, and we can be better or worse at recognizing and responding to appropriately. One important aspect of moral development is that we can teach ourselves and each other to become ...

Utilitarianism also differs from ethical theories that make the rightness or wrongness of an act dependent upon the motive of the agent, for, according to the utilitarian, it is possible for the right thing to be done from a bad motive. Utilitarians may, however, distinguish the aptness of praising or blaming an agent from whether the act was right.
