Since the turn of the century, social theorists have argued that slavery resulted in disorganization and instability in black families (DuBois 1899, 1909; Elkins 1963; Frazier 1932, 1939; Myrdal 1944). Migration to Michigan underwent its most rapid growth in the 1920s--not coincidentally, the same period when automobile production skyrocketed. By 1930, Detroit's population had expanded to ...

The maps reflect the period in which they were produced. They show the world as it seemed to their compilers. Several of the names that appear on the maps (e.g., Kaffir and Ruthenian) are now little used. The racial classifications and Leo Frobenius's Kulturkreise now seem old-fashioned. And, of course, some of the ethnic boundaries (for example, those between Germans and Poles and between ...

women in the village from their natal clans, and other links with their natal home. These kinship ties may mean that the social networks of women in a village may well differ from that implied by patrilineal genealogies. Thus, women from the same natal village, or having close relations through their mothers, may have closer ties than the patrilineal links would imply. Similarly, men who are ...

The "moving wall" represents the time period between the last issue available in JSTOR and the most recently published issue of a journal. Moving walls are generally represented in years. In rare instances, a publisher has elected to have a "zero" moving wall, so their current issues are available in JSTOR shortly after publication. Note: In calculating the moving wall, the current year is not ...

Since very early times, human beings have had some sense of the past, both their own and that of their community or people. This is something that has distinguished us from other species. Having said that, historiography in the narrower sense of intentional attempts to recover knowledge of and represent in writing true descriptions or narratives of past events has had a rather briefer career ...

Genealogy (from Greek: ?????????? genealogia "the making of a pedigree") is the study of families, family history, and the tracing of their lineages. Genealogists use oral interviews, historical records, genetic analysis, and other records to obtain information about a family and to demonstrate kinship and pedigrees of its members. The results are often displayed in charts or written ...

And just as the territorial niches which these states occupy vary greatly from one to the other (see chapter 3), so also do their inhabitants. States are often lightly referred to as 'nations', thus carrying the implication that the inhabitants of each state form only one national group and, as such, are easily distinguished and characterised. In fact, it is the norm rather than the ...

In their exploration of human origins, Takahata et al. examined genealogical relationships among genes sampled from Africa, Europe, and Asia. They found that the probability that the root of the genealogy lies in Africa increases with the effective size of the African population relative to the sum of the sizes of the non-African populations. This finding is consistent with ours because under ...
