[Gizmo Answer Key Human Homeostasis](#)

Other articles where Karyotype is discussed: genetic testing: Karyotyping: To obtain a person's karyotype, laboratory technicians grow human cells in tissue culture media. After being stained and sorted, the chromosomes are counted and displayed. The cells are obtained from the blood, skin, or bone marrow or by amniocentesis or chorionic villus sampling, as noted above.

[Exploring Contemporary Issues in Genetics & Society ...](#)

Human Karyotyping. Background: Occasionally chromosomal material is lost or rearranged during the formation of gametes or during cell division of the early embryo. Such changes, primarily the result of nondisjunction or translocation, are so severe that the pregnancy ends in miscarriage – or fertilization does not occur at all. It is estimated that one in 156 live births have some kind of ...
