2011 Physics HSC Examination 'Sample Answers' Section I Part B Question 21 (a) Sample answer: Question 21 (b) Sample answer: This would not be valid, as  $-100^{\circ}\text{C}$  is outside the range for which the model is appropriate. Even if the model were still true at these lower temperatures, if the existing data were used the result would be imprecise, as small inconsistencies in the slope would be ...

This question is a perfect example of why Mastering Physics can be so misleading. Although it may seem like the problem is giving you all of the relevant information, the correct answer requires you to speculate. If the block were already moving, the addition of the two forces wouldn't necessarily move it in either direction or cause it to stop. For example, if the block were moving left at ...
