A one of a kind book, which compiles both the research and practical applications about the Search and Rescue (SAR) structure and process. This resource is a must for those who are professionals and volunteers in SAR. It will be informative for anyone interested in developing a deeper understanding of the mindset and motivation of those who may be involved as a subject, family member, friend, or participant in a SAR situation. It also expands the lay community's awareness of the ...

Rescue workers are inevitably at a high risk of experiencing psychological symptoms after deployment; however, they do not necessarily have to suffer from adverse psychological sequelae. Individual "resilience" was found to be negatively associated with psychological distress in rescue workers ($r = .70, 203, p < 0.01$).
