The company that made proper board games in the UK was Waddingtons. This list is a celebration of the company's finest moments. This is not to say there haven't been real stinkers along the way - there have - but I like to think that this list contains the games that are still good to play today. And my kids agree with me . The tables produced with this style look more like the tables you can see in the books, scientific articles, and newspapers. The tables differ from the plain LaTeX tables in a few aspects: no vertical rules are used, there is additional space above and below horizontal rules, rules have varying "thickness", and no double rules are used. Use can choose the table style using the select box in ...

You can convert a two-dimensional table into just one column by using the INDEX formula. Unfortunately, it requires some preparations. But on the other hand, it's one of the faster ways (compared to setting up the more complex OFFSET formula like in method 3 below or the INDIRECT formula). Let's see what you need to prepare. Basically you have to create the column and row number in ...
